

Table of Contents

CHAPTER 1. INTRODUCTION	1
1.1 The Current Context	3
1.1.1 Faulting in Mines.....	3
1.1.2 Exploration and Structural Geology - Discipline Disconnects	5
1.1.3 Characterizing Rock Masses and Incipient Structure.....	8
1.2 Path Forward – Outline Guidelines	9
1.2.1 Geological Influences on Mining Methods	9
1.2.2 Fault Interconnectivity and Mobilization Propensity	10
1.2.3 Slip and Rupture Tendency	12
CHAPTER 2. FAULT ARCHITECTURE.....	14
2.1 Geometrical Characterization	15
2.1.1 Morphological Terminology.....	16
2.1.2 Mode of Origin Effects on Fault Morphology.....	18
2.1.3 Morphological Terminology.....	25
2.2 Faults and Fault Systems	28
2.2.1 Tip Damage Zones	32
2.2.2 Linkage Damage Zones.....	34
2.2.3 Wall Damage Zones	37
2.3 Fault Geometry.....	41
2.3.1 Classic Fault Types.....	41
2.3.2 Scale Issues	44
2.3.3 Fault Slip Fabric – Parameter Definition	47
2.3.4 Morphological Indicators	50
2.3.5 Fault Slip and Rupture Length Estimates.....	52
2.3.6 Tectonic Stress Regimes	57
CHAPTER 3. FAULT BEHAVIOURAL CHARACTERIZATION.....	62
3.1 Background	64
3.2 Fault Behaviour	66
3.2.1 Observations of Fault Behaviour.....	67
3.2.2 Factors Dominating Fault Behaviour.....	68
3.2.3 Behaviour Modes	68

STRUCTURAL GEOLOGY GUIDELINES

3.2.4	Pore Pressure Influence	73
3.3	Fault Behaviour Models	75
3.3.1	Growth and Propagation Models.....	76
3.3.2	Frictional Slip Models.....	77
3.4	Faults in a Mining Environment	82
3.5	Summary and Recommendations for Measurement Guidelines.....	85
CHAPTER 4.	PALAEOSTRESS ANALYSIS & FAULT SLIP EVALUATION	88
4.1	Tectonogenesis Assessment and Palinspastic Reconstruction	90
4.2	Stress Inversion Palaeostress Analysis	92
4.2.1	Fracture Pattern Evaluation and Focal Plane Solutions.....	96
4.2.2	Lineation (striation) Rake Angles and Obliquity Complications	106
4.2.3	Fault Mechanism Definition using Ternary (Frohlich) Diagrams	108
4.2.4	Direct Graphical Methods of Stress Inversion	111
4.2.5	Graphical Stress Inversion Search Methods	116
4.2.6	Bredden Graph Method for Stress Tensor Aspect Ratio Definition	121
4.3	Slip Tendency Determination.....	122
4.3.1	Analytical Mohr Circle Solutions.....	124
4.3.2	Application of Slip Tendency Plots.....	130
4.3.3	Excess Shear Stress Evaluation Methods	134
4.3.4	Computational Methods and Slip Tendency Charts	136
4.4	Chapter 4 Closure	138
CHAPTER 5.	FAULT CHARACTERIZATION	139
5.1	Introduction.....	140
5.1.1	Characterization versus Classification; Local versus Global Assessments.....	140
5.2	Mine Scale Characterization of Faults	143
5.3	Initial Steps: Pre-Mining.....	144
5.4	Secondary Steps: Active Mining	152
5.5	Tertiary Steps: As Data Becomes Available	155
5.6	Data Requirements from Drill Core and Level Mapping	155
5.6.1	Drill Core.....	156
5.6.2	Level Mapping	157
5.7	Fault Segment Characterization	163
5.8	Summary	169
	CITED REFERENCES AND BIBLIOGRAPHY	172

STRUCTURAL GEOLOGY GUIDELINES

APPENDICES

APPENDIX A

Characteristic Mine Site Geological Environments and Tectonic Settings

APPENDIX B

Good Practice Guidelines for Core Logging and Routine Rock Mass Quality Assessment for Deep Mining Seismic Event Prone Ground
